

Company Showcase

NOVA GROUP INC.

operates and maintains a pressurized Type II hydrant fueling system, a tank truck off loading facility, a bulk storage facility, an operating storage area, truck fill stands, and a base service station at Al Udeid Air Base, Qatar. At present, approximately 27 million gallons of jet fuel are pumped monthly from the facilities, which is more than the combined monthly amount pumped on all other U.S. bases combined.

Also significant are the 13 waterfront delivery orders, ranging from new construction, including design/build, to repairing and renovating wharves and piers, that Nova completed or is presently constructing for the NAVFAC Pacific, Hawaii. The company is exceedingly proud of its contributions to the Navy's mission, which is to protect and defend the right of the United States and our allies to move freely on the oceans and to protect our country against her enemies. The company says that while repairing deteriorated concrete walls or dry docks may not appear, at first blush, as exciting as constructing a submarine berthing station, which Nova completed for the Navy in Pearl Harbor in 1996, these repair and renovation contracts serve a vital function.

Nova Group receives numerous awards every year. Most recently, the firm received the national Safety Excellent Award from the Associated Builders & Contractors, Inc.

Nova also received a Naval Base Point Loma Public Works Department Safety through Awards and Recognition (STAR) program award for our safety performance during the execution of a pier deck repairs.

In addition, Nova is a winner of the North Bay Business Journal Best Places to Work. As stated by Ron Fedrick, Nova's president and CEO, "We are pleased with this important recognition which underscores our company's strong commitment to our employees and our longstanding involvement in the communities in which we operate and serve."

construct quality projects that exceed its customers' expectations, safely and profitably and in a manner that rewards teamwork," says the company. "In our experience, sustained innovation and quality don't happen without genuine teamwork. As a result, we put a great emphasis on building teams of qualified people to sustain our mission and make believers out of our customers. To encourage and reinforce this process with our project teams, we have a system of project rewards and incentives built around our mission attributes of safety, quality and profitability."

Significant Projects/ Achievements:

What are Nova Group's greatest achievements? The company's answer: "The growth, personal and professional development and the success of our people at all levels within Nova."

Having said that, Nova considers all of its construction projects important, largely because all of its projects serve the mission of the U.S. military. It is a contractor of choice for the Department of Defense, specifically the Naval Facilities Engineering Command and the U.S. Army Corps of Engineers on fueling and marine/waterfront projects.

Nova was a member of a team that designed, constructed and currently

IDIQ MACC waterfront project by Nova Group

History/Background:

Nova Group's motto is "Quality & Innovation in Construction." This maxim has driven the company for decades since its inception. The contracting company was originally founded in 1957. Ronald M. Fedrick purchased the company in 1976 and continues to lead the firm as its president and chief executive officer.

Over time, the company has evolved to meet the changing needs of its clients. Initially, Nova specialized in steam and condensate systems and utility work but now specializes in fueling systems and marine waterfront work. Furthermore, Nova in the past worked primarily in California and Hawaii and now operates throughout the United States and offshore locations.

Scope of Services:

Nova Group is well known for its achievements in heavy construction. It is specifically associated with hydrant fueling and fuel systems and marine/waterfront and marine utility work. These specialties separate Nova Group from other contractors. Furthermore, the company is known for its willingness to take on challenging projects at federal bases throughout the world.

"Nova is recognized throughout the world for using innovation to

QUALITY & INNOVATION IN CONSTRUCTION

CONTRACTOR OF THE YEAR

Founded in 1976, Nova Group, Inc. primarily provides infrastructure construction services to federal government agencies throughout the United States and internationally.

Nova has earned the reputation as one of the nation's most experienced and respected general engineering contractors in the specialized areas of hydrant fueling, waterfront and utility construction.

MISSION: Nova is continuously recognized for using innovation to construct quality projects that exceed its customer's expectations, safely and profitably in a manner that rewards teamwork.
